Why use Pepper Money?

- A simple and transparent range of products, based around the registration date of your client's CCJs, Defaults, or Secured missed/late payments. We've named our tiers after the amount of months these events can have taken place.
- We don't credit score and we don't automatically cascade, so the product you see is the product you'll get.
- Unsecured credit will never affect your product tier.
- Defaults & CCJs don't need to be satisfied and there's no limit on their value either.
- Capital raising, without LTV restriction, for many reasons including business and debt consolidation.
- We have no debt to income ratio.
- 1 year's minimum trading for your self-employed applicants, even if they're new to the industry.
- We'll use the latest year for affordability when trading for 2 years or more.
- We're able to use "add backs" for your Limited Company clients, allowing us to use their pension contributions, director's car allowance, and use of home office costs as income. This is great for boosting affordability in addition to their salary & dividends.
- For employed applicants, we'll take 100% of all additional item such as car allowance if showing on every payslip. We'll annualise the latest three months.
- We'll take earned income up to our maximum age of 75 years at the end of the term without the need for pension proof and as long as the client's role is plausible for them to be able to work up to 75 years.
- Interest Only is available up to 60% LTV without any additional rules. We can still lend up to 75 years, we calculate affordability on the interest only payment, and we'll accept sale of main residence as a repayment vehicle with no pre-defined minimum equity.
