 The Exeter

In total The Exeter paid over £40 million for claims received in 2023 with over £12m for life and income protection combined.

We paid out

£41.2m

in claims last year

Prefer cash? You'd need 82 briefcases to stuff all those £100 notes in.

Which weigh a total of 412kg. Eek.

But to The Exeter, claims aren't just numbers - with each claim they pay they make a difference.

During 2023 they made a difference for over 1,100 members and their families who claimed for income protection and life cover. These differences mean people can still pay their mortgage to keep their home or, for members like Marc, being able to re-train so he can return to work doing something new.
