

## **2025 health assessment price update**

### **Our health assessment prices will increase on 1 January 2025**

This year, whilst still investing in our products and services, we have kept our increase significantly lower than previous years. By doing this, we can continue to offer the most up-to-date and market-leading tests, and your client's employees can keep getting the best out of their health benefit.

Client accounts will renew automatically on 1 January, and we will let them know directly.

### **New for 2025**

#### **More capacity and locations**

We're planning to grow our health centres to 120 locations by 2027, and we'll also be extending our diagnostic capacity.

#### **Improved data insights and reporting**

If at least six of your client's employees attend a health assessment in any year, they'll receive a quarterly company health profile. This offers invaluable insights such as the health of their population and of their industry, along with UK trends and recommendations.
