

Tenant's Contents Insurance Enhanced Quote Journey launched

Following the positive impact of our improved Home and Landlord's Insurance quote journeys, Paymentsshield has announced the next phase of their quote journey optimisation, which now offers an enhanced experience for advisers when generating insurance quotes for tenants.

Generate a quote more quickly

Building upon the success of its existing optimised quote journeys, which have focused on Home and Landlords Insurance, Tenant's Contents Insurance is now available.

In addition, Paymentsshield's list of eligibility questions has been reduced from eight questions down to a single statement.

Pre-populated fields to save time

Now live, the enhanced quote journey means that advisers can generate a quote for tenants in less than a minute, thanks to key property data automatically populated from global data provider LexisNexis Risk Solutions.

This includes property type, build year, number of bedrooms and bathrooms, wall type and brick type.

You can access this new journey via [Paymentsshield's Adviser Hub](#) and you can find out more information on our 5 Star Defaqto rated Landlord's Insurance by [visiting our website](#).
