

Life insurance is coming soon to The Exeter's protection portal

You can access life insurance on our new protection portal, Cover Fixer, from Tuesday 4th March. It's the **one place** for:

- instant pre-sales underwriting decisions for most life insurance and income protection cases
- getting quotes and submitting applications
- combining life and income protection with our new multi-benefit plans.

New multi-benefit plans

With our multi-benefit plans, your advisers can now easily combine life and income protection under one application.

Our life insurance is designed for a broad range of clients. From those with minimal pre-existing health conditions looking to purchase income protection, right through to those with serious or multiple pre-existing conditions.

So we're now more available to more clients. But we still offer the same excellent service levels and underwriting expertise you'd expect from The Exeter.

Alongside the enhancements to Income First we've updated Real Life

- With a new Beneficiary Nomination feature on Real Life, clients can select who they'd like to receive their benefit – without the need for trustees.
- Real Life is now available as joint or dual life which offers more flexibility.
- With a forward-thinking joint life separation option, your advisers can ensure clients are protected after relationship breakups.

We've also made clients' data more secure with multi-factor authentication.
