

Introducing our handy dental allowance

Our health insurance now comes with added dental care. It's a little something extra for your clients to smile about.

What's included?

- ✓ One dental appointment per person per policy year.
- ✓ This can be used at a Bupa Dental Care practice for a routine check-up, new patient examination, or emergency appointment. Please note it cannot be used for a routine hygienist appointment.
- ✓ If the dentist recommends further care, we'll provide a £300 allowance towards restorative treatment. This covers things like crowns or fillings.

Who's the benefit for?

- ✓ The policy owner – and everyone covered by the policy – has access to the benefit.
- ✓ Anyone who starts a new health insurance policy is eligible.
- ✓ If a customer has an existing policy, they'll receive the benefit from 17 February 2025 regardless of their renewal date.

How does it work?

- Customers don't need to add the benefit to their policy. It'll be applied automatically.
- To book an appointment, they can find their nearest Bupa Dental Care practice at bupa.co.uk/dental-care
- When they arrive, all they need to do is let the receptionist know their membership number. If they're new to Bupa Dental Care, they'll need to register at the practice.*

How is the cost claimed back?

- After treatment, the practice will send us the claim and we'll pay them directly.
- The benefit doesn't impact their no claims discount or low claims bonus.
- Customers will need to pay for any dental treatment that exceeds the benefit allowance or isn't covered by their policy.

We've updated our dental allowance with a big new change. When it launched in August 2024, it was only available to new and renewing customers. From 17 February 2025, the dental allowance will be available to all your clients, regardless of their renewal date. Existing customers will receive a mailing to notify them of this change.
