

## Why choose one when your customers can have six?

Yes, that's right, Zurich Accelerate has SIX individual services to offer a package of medical care services for cancer, heart and neurological conditions.

Your customers can use as many or as few of the services as they like and can access these at any point. They don't have to follow a linear path and they can choose to combine Accelerate with services offered by public healthcare or their current healthcare provider if they want to.

Accelerate is a complementary service to both public and private healthcare and is not intended to replace either. It gives your customers an alternative route and should be taken up in consultation with their GP. It's all about giving them choice and offering them greater control over their healthcare decisions.

A graphic with an orange background and white clouds. It features a list of six services, each with a checkmark. The text 'Find out more about Zurich Accelerate' is written in white. A white rocket is shown launching from the bottom right, leaving a trail of white smoke.
