Our new National Account Manager

We'd like to start off by announcing that **Jemma Colley**, previously a BDM at Uinsure, has been promoted to **National Account Manager**.

INCREASED FLOODING RISK

Data from Aviva that shows 35% of Home Insurance flood claims are occurring between June and August, making it a great time to remind your customers of these handy tips:

1. Where possible, move electrical equipment and sentimental items upstairs to reduce risk of damage
2. Make sure you know how to turn off your gas, water and electricity in case you need to leave your home during a flood
3. Get sandbags to place on doors, windows and on any other gaps to reduce water coming in
4. Clean out gutters at least twice a year to keep them free of leaves and debris that could lead to water damage to the roof and walls

5. Check what your home insurance policy does and doesn't cover in extreme weather conditions

We've also put together a list of resources you can send to customers if they're concerned about bad weather and flooding. Head over to Uinsure's LinkedIn to have a look and make sure to follow us for more tips like these in the future:
