

We're reducing turnaround times by streamlining requests for medical information with iGPR.

You'll now be able to track the status of medical reports and have greater visibility on completion times throughout the application journey because we've integrated our online portal with iGPR's digital platform.

We'll issue medical report requests electronically to GP surgeries already using the iGPR system, reducing the need for time-consuming paper handling and minimising the risk of lost documents and human error. And because reports will be encrypted and transmitted securely in line with NHS standards, your clients' privacy is protected at every stage.
