Source™

Declined Quotes, Reconsidered.

Our Second Chance feature automatically revisits declined cases when insurer appetites change.

Not every declined case stays declined.
As insurers continually review their pricing models and underwriting criteria, properties that were previously declined can become eligible for cover at a later date.

Turning Previous Declines into New Opportunities

How It Works

From decline to opportunity

1. A quote receives a full-panel decline
2. Source automatically re-runs the quote every day for **90 days.**
3. If cover becomes available, a new quote is created automatically
4. The quote appears in the ‘Second Chance’ section of ‘Saved Quotes’
5. This quote is guaranteed in line with our standard timeframes
6. Select ***'Access Quote'*** to continue the case as normal

Benefits For Advisers

Make every quote count

- Creates additional opportunities from cases that may otherwise have resulted in no business
- Allows advisers to reconnect with clients when cover becomes available
- Supports ongoing client relationships beyond the initial quotation
- Continues working in the background while advisers focus on new business
