

We've strengthened our Group Life
and Income Protection offerings

[Join our webinar](#)

As cancer becomes more common in working life, its impact is felt earlier - during testing, referrals and uncertainty, when employees and employers don't know what comes next.

From **31st July**, our Group Income Protection and Group Life products will include a new **personalised cancer navigation service** via Help@hand, available to all new and existing policyholders. For all existing clients with access, this service replaces Cancer Assist from Reframe.

Someone to guide employees and their loved ones when Cancer is a worry

Delivered with **Reframe Cancer**, this new service gives employees access to a cancer navigation specialist for guidance when they need it most. Whether facing tests, a diagnosis, or supporting a loved one, it helps them understand what's happening, navigate next steps, and feel more confident alongside their medical care.

Earlier support helps employers maintain engagement, reduce absence risk and support managers in difficult conversations.
